

Join the Evolution

The technology for eLearning has undergone rapid change in the last decade. Originally, Course Management Systems (CMS) were designed to enable instructors to post course material online so students could take courses online.

The challenges with this approach centered on the loss of face-to-face time, lack of a feeling of "connectedness," and the reality that simply posting material online does not create a course that ensures students learn and return to engage.

The next phase emerged in the form of Learning Management Systems (LMS). The focus switched from managing courses to managing learning. The LMS provided tools that encouraged synthesis, discussion and debate. However, students still felt disconnected from their peers and instructors.

The third phase began with the adoption of Web 2.0 tools such as wikis, blogs, online communities, secure social networks and other networking tools. The product that emerged from this next stage in evolution is the LMS-SN or Learning Management System with Social Network. This is also referred to as a Networked Learning Environment or NLE.

Edvance360 LMS-SN, the first LMS-SN/NLE, focuses on the context in which we learn: relationships. By providing the social learning tools that enable instructors to create collaborative learning environments, learners are engaged from the moment they apply until they finish and beyond. Users build lasting relationships with fellow students, teachers, mentors, and staff, making them feel integrated and connected.

Easy to Use

- Designed by faculty for faculty
- Dashboards alert faculty to assignments turned in from students, items needing a grade, tests needing review, lessons overdue, and more
- Notification Agents manage tasks automatically so faculty don't have to think about them
- Video tutorials included for all tools
- Collaborative tools provide for management of discussion, debate, file sharing, and more
- 2011 CODiE award winner and six-time finalist for "Best Post-Secondary Course or Learning Management System"

Easy to Migrate

- SCORM & Common Cartridge compliant
- Courses migrated at no additional cost
- Custom importers for other CMS/LMS vendors
- Custom importers for publisher content
- Live integration with all Student Information Systems
- Integrated with third-party vendors such as TurnItIn™, Respondus™, and more
- Training included in license fees
- Technical support included in license fees
- Commitment to 95% or higher faculty usage

Easy on the Budget

- Usually 30-60% less than competitor products
- "Value-added" features included in price such as ePortfolios, Learning Outcomes, Rubrics, repositories, 99.99% uptime guaranteed hosting, technical support, and more

Connect

Connect applicants, current students, faculty, staff, mentors, administrators, and alumni via a secure social network, collaborative communities, discussion forums, blogs, wikis, ePortfolios, surveys, and more.

Create

Leverage any file type, website, external software or tools to create lessons and build courses to reach desired outcomes.

Teach

Manage courses via Instructor Dashboard and Notification Agents, deliver online courses as well as hybrid courses, customize course tools to teach topics, develop synthesis and critical thinking skills, and create life-long learners.

Collaborate

Enable effective and safe collaboration via Web 2.0 tools such as secure social network, wikis, blogs, and community tools.

Track

Track student progress through lessons/learning paths and via faculty-designed Gradebook.

Assess

Use integrated Learning Outcomes Management, ePortfolios, rubrics, and automatically graded tests to measure success.

Complete Solution for eLearning

Edvance360 LMS-SN provides everything your school or organization needs to get started or to make a transition away from another vendor as easy as possible. We take the time to understand your current challenges and goals. We import your courses and work with your instructors to ensure a 95% or higher faculty usage rate. We host the software so you don't have to, provide raving support, include all the cutting-edge learning tools and integration with third-party vendors, and we don't charge extra for necessary tools like Learning Outcomes Management and repositories. It's all right here, right where you need it.
