Temp at Receipt

Test **Enzyme Substrate Test**

Date/Time of Analysis 09/19/2014 11:15
Test Method: SM20 9223B

Analyte	Result
Total Coliform	Not detected
E.coli	Not detected

■ THE WATER SAMPLE TESTED IS BACTERIOLOGICALLY SUITABLE FOR DRINKING(POTABLE).
**IMPORTANT: Bacteriological testing of a single sample of water is only one means of determining the suitability of water for drinking. It is also critical that the water source location, system construction and ongoing maintenance/treatment are adequate to consistently protect against bacterial contamination.

Units of Measurement and Definitions: mL = milliliter, > equals greater than, MPN = Most Probable Number, CFU = Colony Forming Unit, TNTC = Too Numerous To Count

The test results included on this report meet all National Environmental Laboratory Accreditation Program requirements unless noted otherwise. Test results relate only to the samples tested and are representative of the samples as they were received at the laboratory. This is a public record. Information contained in this report may be used for statistical purposes and may be released upon request, pursuant to Vermont Access to Public Documents law (1 V.S.A. 315-320). This report shall not be reproduced, except in full, without the written approval of the laboratory.

Test Report Authorized By: *Mary Celotti*
Mary Celotti, Laboratory Director
